### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher M Tobin (Reg# 40.290) on 7 September 2006.

The application has been amended as follows:

Claim 12 is canceled.

1. Claims 1-11 and 17 are allowed.

The following is an examiner's statement of reasons for allowance:

2. The cited prior art, Shear US Patent No. 6,157,721, Apperson et al US Patent No. 5,978,484, Patel et al US Patent No. 6,438,690, Fischer US Patent No. 4,868,877, Sudia US Patent No. 5,659,616, and Bisbee et al US PGPub 2001/0002485, teach methods of providing certificates to users in response to request for certificates. The cited prior art further teaches a method of applying multiple signatures to data objects. However, the cited prior art fails to teach multi-signed public key certificates including at least a basic area and an extended area where the public key certificate is transferred .

Art Unit: 2134

between a plurality of certificate authorities and the respective certificate authorities apply their own digital signature algorithm to the multi-signed public key certificate. Further, the cited prior art fails to teach first and second signatures generated by respectively applying the first and second signature algorithms to information in both the basic area and the extended area of the multi-signed certificate. As a result, the cited prior art fails to anticipate or render obvious the above-cited claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
